

1. [Performance](#)

Performance

Now we execute larger-scale runs to benchmark performance:

Code from [PerformanceTester.java:190](#) executed in 0.19 seconds (0.000 gc):

```
test(component, inputPrototype);
```

Logging:

```
2 batch length, 5 trials
```

```
Input Dimensions:
```

```
[125, 84, 192]
```

```
Performance:
```

```
Evaluation performance: 0.009549s +- 0.001216s [0.008325s - 0.011632s]
```

```
Learning performance: 0.029018s +- 0.001138s [0.027485s - 0.031000s]
```
